

## SHARP'S NEW SURROUND SOUND RACKS UP THE FEATURES

Sharp has again revolutionized home theatre entertainment with the introduction of the new and innovative TV Cabinet ANPR1000H, Sharp Aquos Rack System. This innovative TV cabinet/ Front Surround Sound system combination is the first Sharp audio product to feature the amazing new Audistry™ by Dolby®. Audistry offers the very latest in personal sound technology, providing customers with the ability to enhance their listening enjoyment by adjusting the sound to their precise requirements.

Designed to complement the Sharp Aquos LCD TV range, the easy to assemble ANPR1000H can also be used with other brands. It features a 2.1 Channel Front Surround System delivering high power Sound Playback. Boasting 300W RMS Total Output Power, the ANPR1000H offers truly remarkable home theatre sound quality without the complicated setup of multiple speakers, wires and components.

Another exceptional feature of the Aquos Rack System is the LCD function panel located at the front of the unit, providing convenient entertainment control via the multi function remote control. Imagine the luxury of just one remote to control your entire home theatre and music requirements. With the one remote, you can flick from Sharp LCD TV to DVD and to radio. This remote also can be used in conjunction with other selected brands.

With its lustrous piano finish and ultra modern look, the ANPR1000H is designed to fit with every type of décor, particularly when combined with a sleek and streamlined Sharp Aquos LCD TV. This stylish cabinet comes complete with both a solid glass top and lower shelf with the left and right sub woofers doubling as supports

When it comes to sound quality, Sharp's Aquos Rack System featuring Audistry technology will change the way you think about sound forever. Audistry has the ability to enhance sound signals in such a way that it produces a level of performance not previously possible. The **Sound Space Expander** gives the illusion that the speakers are much wider apart than they actually are delivering an increased sense of ambience and clearer sound.

Other Audistry features include the **Natural Bass**, which enhance bass performance without distorting the sound or risking damage to your equipment. Audistry's **Intelligent Volume Control** is great for night time watching as it automatically corrects any sound level irregularities making the loud sounds softer and the soft sounds louder. The **Mono-to-Stereo Creator** improves the listening experience by generating a stereo output from a mono input signal as found in some old classic films, television broadcasts and AM radio.

The ANPR1000H, Aquos rack system, is due for release in September 2006  
RRP\$1099
