SHARP RELEASES TWO NEW MULTIMEDIA NOTEVISION PROJECTORS

Perfect presentations and the ultimate in home theatre experiences are now within everyone's reach thanks to two new multimedia **Notevision** projectors from Sharp.

The **XG-MB70X** and **PG-MB60X** are true XGA multimedia DLP projectors boasting high contrast and brightness, light weight, superb dust resistance and long lamp life.

The **XG-MB70X** enjoys 3000 ANSI lumen coupled with 2000:1 contrast for vivid colours and easy viewing. The unit also has superb dust resistance through its highly sealed optical system from the DLP to the lenses. Even with all these features, the **XG-MB70X** weighs in at only 4.1kg and fan noise is only 32db in eco mode.

The auto-focus function and the 1:1.5 zoom with power iris makes this model easy to use in any room size by experts and amateurs alike.

Similarly, the **PG-MB60X** enjoys 2500 ANSI lumens coupled with 1000:1 contrast for vivid colours and easy viewing. The unit is also dust resistant through its sealed optical system. The **PG-MB60X** weighs in at only 4kg and fan noise is a whisper quiet 29db in eco mode. The **PG-MB60X** also has a 1:1.5 power zoom and power focus functions.

Both the **XG-MB70X** and **PG-MB60X** feature short-throw lens technology for widescreen viewing no matter what the room size; and active digital auto keystone correction. Projection size ranges from small presentations of only 102cm, to a true cinema experience of 762cms from both wall mounted and desktop placement.

Image quality and resolution is second to none with SXGA+ intelligent compression and true XGA high-resolution images. The **XG-MB70X** features a LAN connection to allow functions such as power on/off, switching inputs, monitoring lamp failure or unusual heating and fan breakdown.

The input terminals include computer RGB, video, s-video, and audio.

Both models are digital TV and high-definition TV compatible for the perfect viewing experience, and have a 3000 hour long lamp life (eco mode) and brightness switchover functions. The units can be operated with the included remote control or via mouse functions and have built-in 2W speakers.

Model	Available	RRP
XG-MB70X	Now	\$5,999
PG-MB60X	Now	\$5,499
