

External water dispenser with Sharp's new 555L refrigerators

Chilled water will be more accessible with Sharp Corporation of Australia's new 555L top mount refrigerators with a front mounted water dispenser, the silver SJTD555SS and white SJTD555SWH.

Blending easily with any contemporary kitchen décor, both models feature a four litre integrated water dispenser allowing convenient access to filtered cold water at any time without the added plumbing expense.

The SJTD555 refrigerators incorporate an innovative Hybrid Cooling System which features an aluminium panel located at the rear of the refrigerator which is cooled to approximately 0°C. The panel's chilled air is spread evenly throughout the compartment minimising loss of food quality by helping to prevent excessive dryness, uneven cooling and over-cooling.

An inbuilt Ag Nano Deodoriser helps to maintain food quality and freshness by using a special deodorising filter. This helps to reduce unpleasant or strong food odours by trapping odour causing molecules as the air circulates inside the refrigerator, resulting in a fresher and cleaner fragrance.

Two adjustable shelves with a generous width of 800mm, allow storage of tall and wide items including birthday cakes and party platters. Door pockets in a variety of sizes are featured to allow convenient storage of drinks, condiments and tall bottles. The slide out fresh room has a lower temperature than any other compartment to keep dairy products and cold meats fresher and prevent odours being absorbed from other foods. While the fruit and vegetable drawers help to keep foods crisp and fresh. An egg tray is also included.

Flexible freezer storage is also available with a pizza-size and regular door pocket, also featuring a twin twist and serve ice tray with storage box.

RRP:

SJTD555SS: \$1758.90

SJTD555SWH: \$1648.90
