

Sound quality and an eco-conscious design with Sharp's mini system

Sharp Corporation has expanded its current range of mini component systems to include the powerful CD-DH790NH which boasts iPod and USB terminals.

Delivering a powerful 200W total RMS output of clear, quality sound, the CD-DH790NH mini system with USB and iPod terminals features a top docking iPod connection to play and charge most iPods and video-out for streaming video and photo files from all iPods with video capability.

The system includes USB host which allows for easy connection and streaming of MP3 and WMA files from USB storage devices, and a single cassette deck. The front audio input offers instant connection to other audio equipment.

Excellent audio reproduction from this mini system is enhanced due to a powerful 100W per channel digital amplifier, combined with a five-mode pre-programmed equaliser and inbuilt X-BASS system. The two-way speakers deliver clear and good quality audio perfect for enjoyment in a cosy living area, bedroom or home office.

The CD-DH790NH is environmentally friendly with only 0.4W power consumption in stand-by mode. The unit also includes an AM/FM tuner with 40-station preset memory and an alarm/sleep function clock. A full function remote control ensures easy adjustment and music source selection from the comfort of the sofa, bed or office chair.

The CD-DH790NH is available now from leading electrical retailers at \$329 RRP. For further product information and full specifications visit www.sharp.net.au or call 1300 135 530.
