

### **New Sharp DLP® projector delivers high performance at low price**

Sharp Corporation of Australia has announced an expansion of its suite of professional projectors to include the DLP® BrilliantColor PG-D4010X, developed for corporate and education markets.

The new PG-D4010X projector is a high brightness single-lamp system offering an excellent value to the customers. It delivers an outstanding brightness of 4200 ANSI Lumens and 2500:1 contrast ratio for a clear picture in nearly any lighting condition.

The projector features the DLP sealed system, which prevents dust, dirt and smoke from entering core parts of the optics. Its filter-free design results in less maintenance, lower ownership cost and longer projector use. When the full projector brightness is not required, use of a low power “Eco” Mode is recommended, which extends the projector lamp life and reduces fan noise for quieter and even more economical operation.

Inbuilt high power output stereo speakers (5W per channel) are sufficient for use without the need for a peripheral audio system in some situations, further contributing to total installation cost savings.

The PG-D4010X provides XGA native resolution (1024x768), but in Intelligent Compression System it is compatible with the signal resolution up to UXGA enabling projection from a wide variety of input sources. It offers HDTV compatibility for use with current and future video technologies as well as extensive connectivity. The PG-D4010X includes a DVI-I analogue/digital source, RGB and component inputs, S-video, composite video and stereo audio, an RS-232C port and a USB input for mouse control. There is also a RJ-45 LAN connection for remote control and access by a Web browser for diagnostics and automatic e-mail of product status.

The PG-D4010X is well suited for permanent installations as well as offering additional features designed for safe mobility, including lens cover protecting optics and the inbuilt carry handle. Other useful features include image shift function, theft deterrent system lock, key lock preventing unauthorised use and presentation-assist functions by remote control (page up/down, pointer, spotlight and mouse control).

The Sharp PG-D4010X projector is available now from leading AV specialists and retailers at \$3,299 RRP. For further product information and full specifications visit [www.sharp.net.au](http://www.sharp.net.au) or call 1300 135 530.
