

Sharp launches new short-throw data projector

Sharp Corporation of Australia has announced the release of the new PG-F267X DLP® short-throw projector delivering excellent presentation performance for both business and education applications.

Featuring a short-throw lens, the PG-F267X provides impressive presentations in limited space or a small room. Requiring only 1.3 metres to project a 100 inch diagonal picture, the projector can be placed close to a wall or screen to free up space during business meetings or classroom situations. With its short throw capability it is suitable for installations with electronic whiteboards. It allows distraction-free presentations by reducing presenter's shadow on the image, and prevents eye glare from the projector light.

The projector's BrilliantColour™ technology and six-segment colour wheel delivers superb picture brilliance and vastly superior colour nuances. Crisp details and sharper blacks are produced thanks to a high 2200:1 contrast ratio. The PG-F267X boasts 2500 ANSI lumens brightness and can project high resolution images up to UXGA (1600 x 1200) and SXGA+ (1400 x 1050). It is also compatible with digital high definition 1080p.

Connection to other equipment is made easy thanks to multiple input terminals including DVI-I for digital and analogue input, D-sub terminals (in/out) as well as compatibility with AV equipment, computers and video game consoles.

The PG-F267X is equipped with Sharp's Unique Network System providing remote access and management of the projector via a LAN connection. It enables projector control with a web browser, remote periodic diagnosis and auto email sending, the ability to link to a specific website, and monitoring for theft deterrence. The projector is also compatible with devices that support PLink™.

Other useful features include image shift function, theft deterrent function system lock, key lock function and presentation-assist functions by remote control (page up/down, pointer, spotlight and mouse control). Superb dust resistance is achieved with a DLP® sealed optical system and dust filter.

The Sharp PG-F267X projector is available now from leading AV specialists and retailers at \$2,699 RRP. For further product information and full specifications visit www.sharp.net.au or call 1300 135 530.
