

Sharp caters with the industry's first dual control commercial microwave

Sharp has announced the ultimate in time and space saving design for busy commercial kitchens. The newly released heavy duty 1900W commercial microwave, R1900J, boasts the industries first microwave oven with dual control panels.

This new concept microwave has been especially designed to help better utilise scarce resources in busy professional kitchens.

Regardless of the kitchen set up, the ergonomic friendly TwinTouch dual control panel makes reaching easy whether the oven is placed on a counter top, high shelf or stacked on top of another R1900J microwave.

Designed to save time and deliver results quickly the unit also boasts a high output power of 1900W, along with Double- and Triple-Quantity Pads, Repeat Cooking Function and Express Defrost.

Even though the R1900J has a small footprint, the large capacity interior lets you fit in two IEC 1/3 steam table size containers making it the perfect choice for high volume food outlets.

The stainless steel interior and exterior resists chipping, scratching and corrosion and also comes with super-rugged grab handle and hinges, designed to withstand years of handling in a busy kitchen environment.

The Sharp R1900J offers a wide range of customisable settings to accommodate any kitchen's unique requirements. Other handy features include 100 user programmable memories, 4-stage cooking sequences, 11 power levels and a ceramic base which enables the use of the full oven cavity when cooking.

Sharp's R1900J is available now from food service supply stores, and is priced at RRP \$2,999. For further product information and full specifications visit www.sharp.net.au or call 1300 135 530.
