

### **Sharp releases new DVD micro system with HDMI**

Sharp Corporation of Australia has introduced a new DVD micro component system, the XLDV75H, providing a high quality picture and sound experience.

The XL-DV75H is convenient and eliminates the need for a separate DVD Player. It is the answer to a consumer's preference for clutter-free living and bedroom areas.

Featuring HDMI output and Dolby Digital, high quality pictures are achieved by up-scaling the DVD micro system to 1080p output. Enrich your movie experience by playing a wide variety of disc types including DVD, CD-R, MP3, JPEG, DivX, SVCD and VCD.

It offers crystal clear high performance audio output with extra bass (X-Bass) function. This unit also has a pre-out terminal for an active subwoofer.

The Sharp XL-DV75H features an inbuilt FM tuner with 40 station preset memory, full function remote control and an inbuilt clock/timer/sleep function.

Available in a stylish black piano finish, the XL-DV75H is designed to complement traditional or contemporary interiors. The main unit is only 175mm (wide) x 138mm (high) x 225mm (deep), while the speakers are both 130mm x 170mm x 210mm, making this model the perfect fit for bookcases, wall units or cabinets.

The Sharp XL-DV75H DVD micro component system is available now from leading electrical retailers at \$269 RRP. For further product information and full specifications visit [www.sharp.net.au](http://www.sharp.net.au) or call 1300 135 530.
