

## **Good looking sounds better with Sharp**

As the search for better quality gadgets that are sharper and more performance driven reach fever pitch, Sharp Corporation of Australia has released a new micro system that promises compatibility and striking appeal taking music listening to the next level.

The XL-HF200PHBK micro system with USB and iPhone/iPod terminals features a top style dock for direct connection that plays and charges most iPhones/iPods, essential for those after a range of connectivity options.

Featuring CD-R/RW playing options, the system's USB host also allows for easy connection and streaming of MP3 and WMA files from USB storage devices. The front audio input offers instant and simple connection to other audio equipment. Other terminals include video output/input, headphones, FM and AM antennas, subwoofer pre-out and speakers.

The XL-HF200PHBK's high performance sound is due to a powerful 50 watt per channel digital amplifier, combined with a six-mode pre-programmed equalizer and the enhanced bass function of the inbuilt X-BASS system. The two-way speakers deliver clear and good quality audio.

The XL-HF200PHBK is environmentally friendly with only 0.4W\* power consumption in stand-by mode. The unit also includes an AM/FM tuner with 40-station preset memory and an alarm/sleep function clock. A full function remote control ensures easy adjustment and music source selection from the comfort of the sofa, bed or office chair.

Sporting a sleek design with black hair line finishing, this new stylish addition from Sharp is intended for multi-purpose use. Available in black, the XL-HF200PHBK is a convenient and modern unit at \$349 RRP.

The Sharp XL-HF200PHBK Micro System is available now from leading electrical retailers. For further product information and full specifications visit [www.sharp.net.au](http://www.sharp.net.au) or call 1300 135 530.

(\*) This power consumption value is obtained when the demonstration mode is cancelled in the power stand-by mode. For further details on cancelling demonstration mode, please refer to the manual, p 4.
