

Top Mount refrigerator range with Hybrid Cooling

Plasmacluster Ion system

(SJPT555RHS only)

Sharp's exclusive Plasmacluster Ion system is effective against bacteria and airborne mould spores. Positive and negative ions released from vents inside the refrigerator permeate the air throughout, affecting the cell membrane of bacteria and halting cell reproduction. This helps keep food fresh and reduces odours.

Electronic temperature control

This refrigerator range has been designed with temperature sensors cleverly located near where food is stored. Temperatures can then be automatically adjusted within the compartment so food stays fresh for longer.

Sharp Hybrid Cooling

The Sharp Hybrid Cooling system is designed to help keep food fresh. The aluminium panel at the rear of the refrigerator compartment is cooled to approximately 0°C. Chilled air is then spread evenly throughout the compartment which helps prevent excessive dryness, uneven cooling and over-cooling. Hybrid Cooling effectively minimises temperature fluctuations within the refrigerator so food lasts longer.

Nano-deodoriser

The deodoriser contains small, nano-sized molecules. Odour molecules are larger than the nano-sized molecules so they trap the odour molecules when air passes through the filter. This helps to reduce odours inside the refrigerator.

Plasmacluster is a trademark of Sharp Corporation.

SJPT555RHS

High grade silver finish

Moveable tray-shelf in the freezer compartment helps you to store frozen food separately.

(SJ-PT555RHS only)

Fresh case with cover for storage of meat, poultry and fish.

Half pair tempered glass tray is split into two sections. Remove half of the shelf to store tall bottles.

(SJ-PT555RHS only)

Food storage icons provide helpful hints as to where it is best to store different types of food.

Pizza pocket makes it easy to store frozen pizza. Just open the top of the pocket and slip in the box.

Door pocket with cover keeps small items secure in the door pocket.

(SJ-PT555RHS only)

Tube store/bottle stopper can be used as a case to store small tubes and is moveable for efficient bottle storage.
